

Santorio Foundation

Translation of innovation

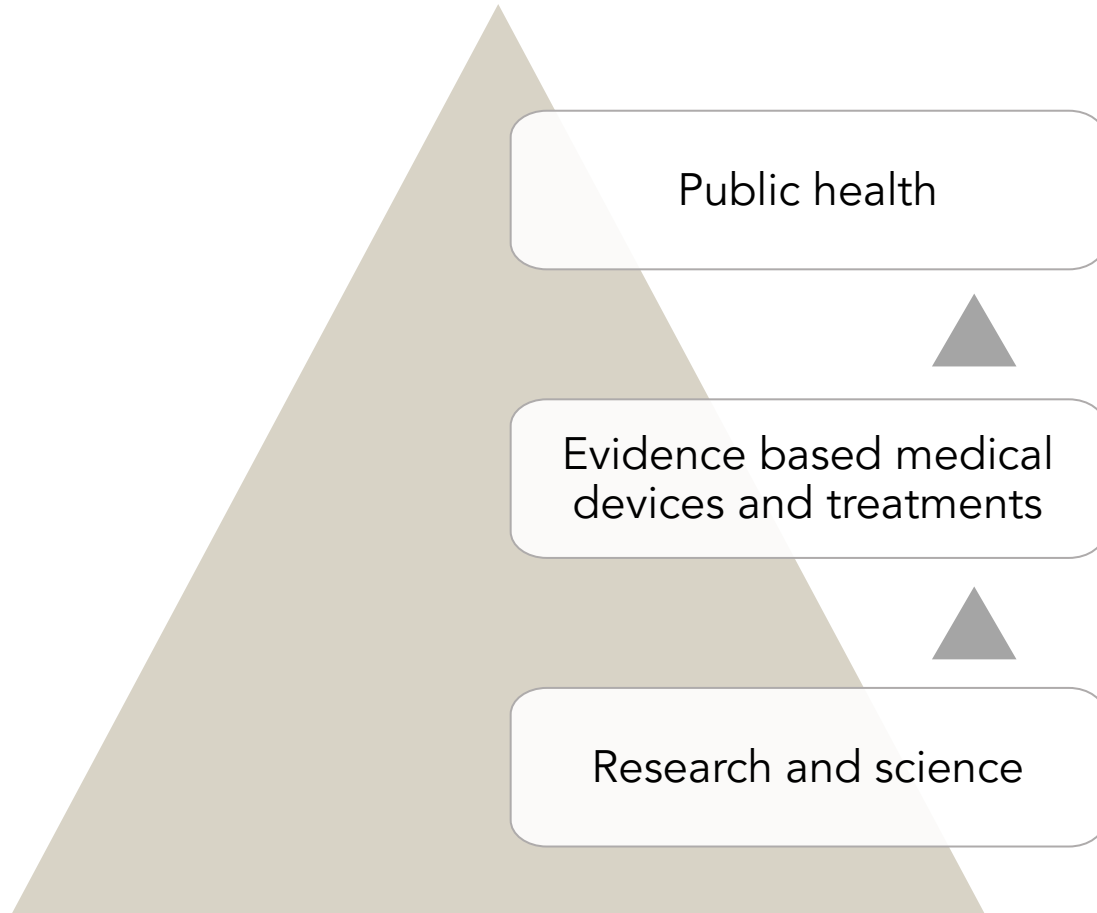

in the field of Food, Nutrition and Health

10e Conférence Agroscope sur la durabilité, January 26th 2023
Ainara Bujanda-Cundín, Director of Strategy and Product

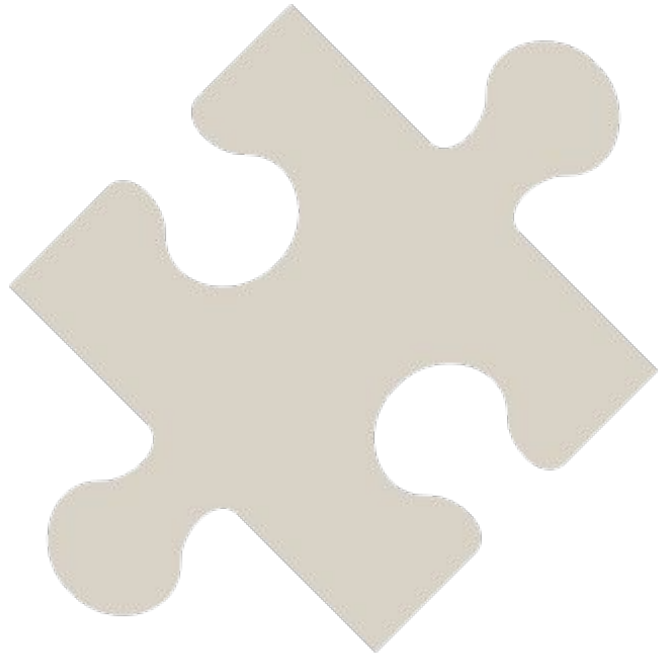

Santorio Foundation: our Purpose

- To conduct and promote **translation of innovation** in the field of food, nutrition and health;
- To provide **validated innovative solutions for the scientific community** with a view to leverage research in the field of food, nutrition and health;
- To contribute directly or indirectly to the **publication and dissemination of scientific evidence** in the field of food, nutrition, and health.

Introduction

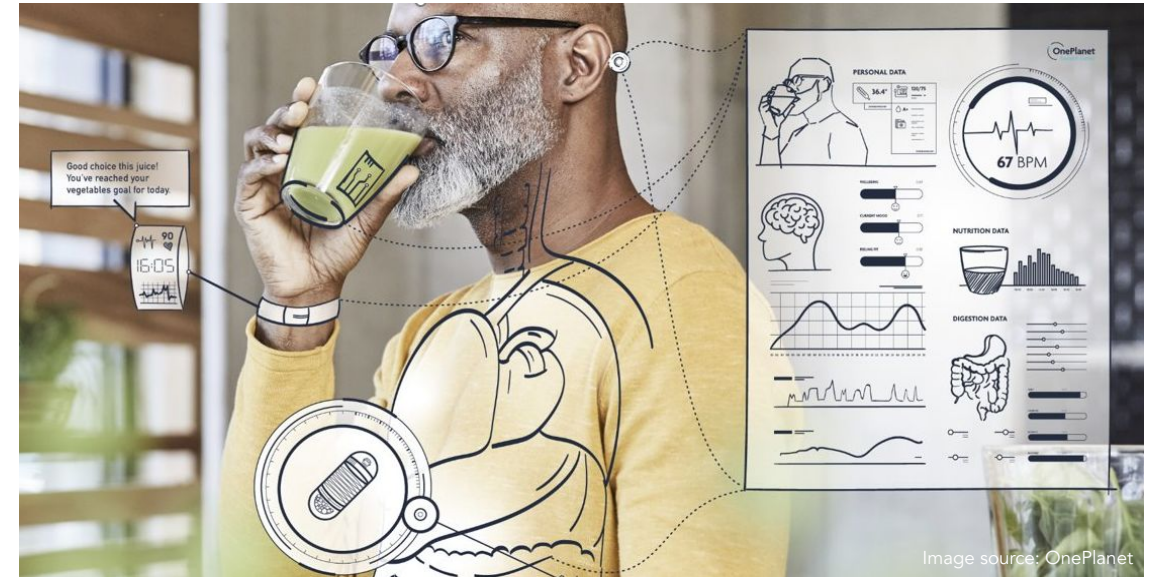

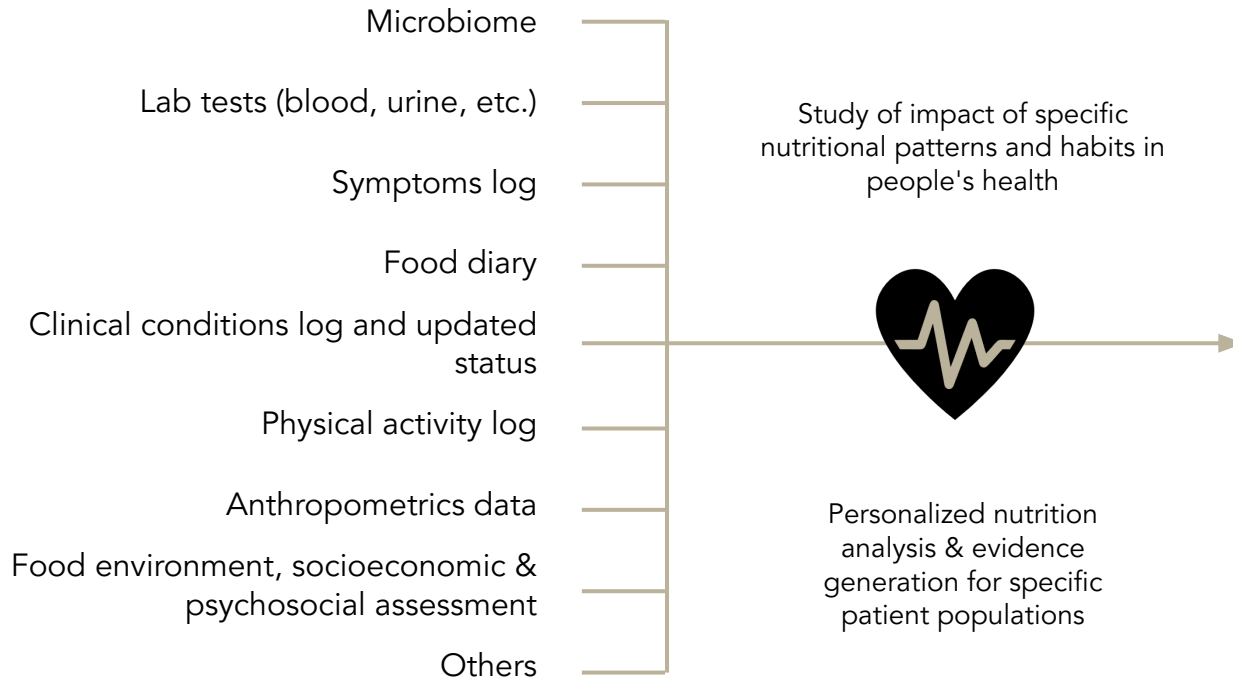

Nutrition is a field with an immense potential in healthcare that lacks, at its base, evidence-based science to move forward and reach patients and society

What is the challenge
we at Santorio are
addressing?

What do we need for Nutrition to be used in Prevention and Interventional Treatment?

- Validated prevention and interventional treatments based on nutrition
- Validated medical devices that enable the delivery of precision nutrition

Current Scenario

Research

Use of non-validated tools, compliant platforms, procedures and methods

Clinical trials results

Not comparable results
Not reproducible trials

Translational medicine

Lack of evidence-based certified medical devices to support the delivery of precision nutrition

How is Santorio
addressing this
challenge?

Our Translational Mission for the Scientific Community

From Innovative Prototypes born at Universities and Research Centers to Validated and Certified Digital Products and Solutions to support Researchers in the field of Food, Nutrition and Health

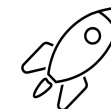

Proof of concept

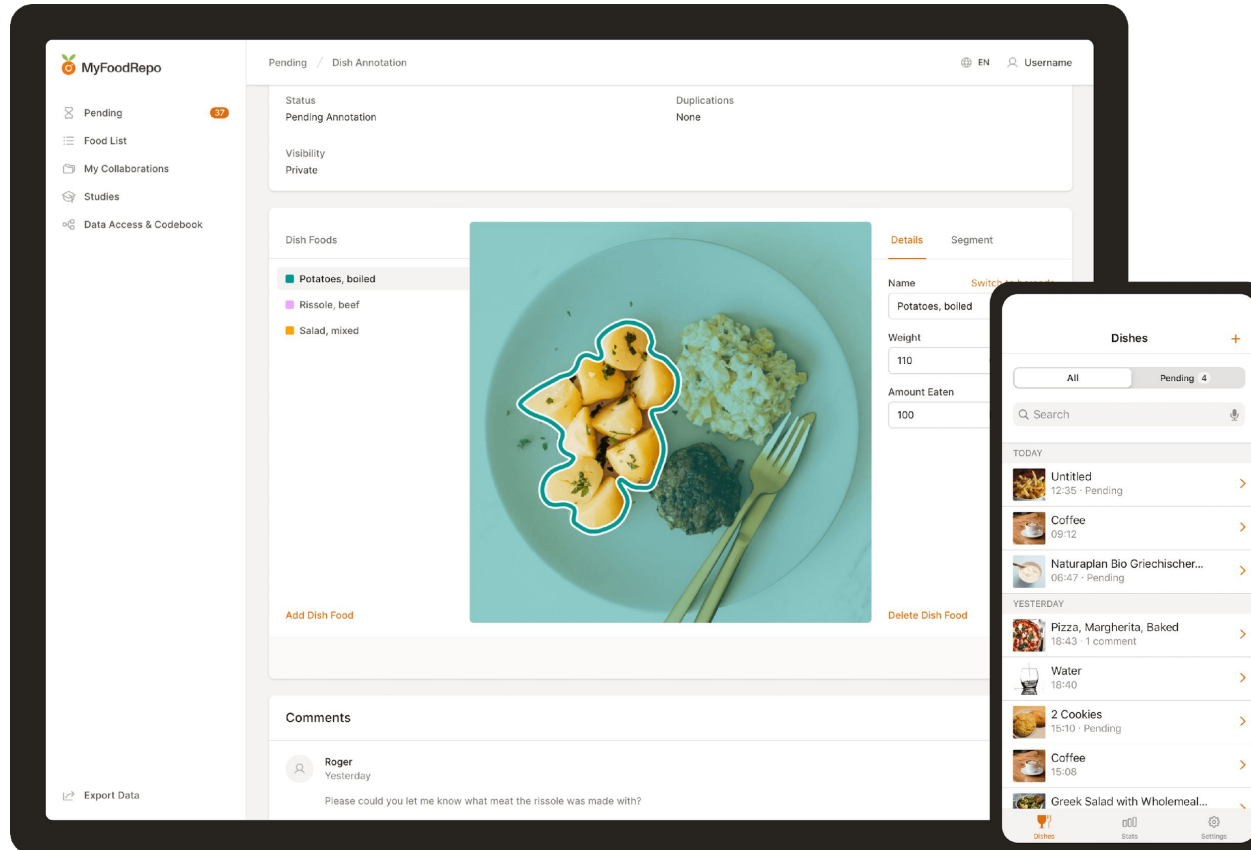

Minimum Viable Product

Final product

Example: MyFoodRepo

EPFL

Thank you!
