

|                                    |  |
|------------------------------------|--|
| <b>Strain number:</b>              | SAF46 (Swiss culture collection of Arbuscular Mycorrhizal Fungi)   |
| <b>Other collections' numbers:</b> | ISCB46   |
| <b>Species:</b>                    | <i>Septoglomus constrictum</i>                                     |
| <b>Organism type:</b>              | Symbiotic rhizosphere fungus                                       |
| <b>History:</b>                    | Pure culture since 2001, deposited at SAF 2008                     |
| <b>Collector:</b>                  | Fritz Oehl   |
| <b>Isolator:</b>                   | Fritz Oehl   |
| <b>Identifier:</b>                 | Fritz Oehl   |
| <b>Conditions for growth:</b>      | Pot cultures with host plants                                      |
| <b>Form of supply:</b>             | active   |
| <b>Original substrate:</b>         | Calcaric Regosol   |
| <b>Geographic origin:</b>          | Vogtsberg im Kaiserstuhl, Southern Germany, semi-natural grassland |
| <b>Nucleotide sequences:</b>       |  |
| <b>Literature</b>                  |  |
| <b>Application:</b>                | Biofertilizer, Bioremediation                                      |
